

## A NEW HEAVY DUTY UAS GENERATION – MADE IN SWITZERLAND!

Xer Technologies AG (Switzerland) is dedicated to developing, producing and marketing heavy-duty and customisable unmanned aerial system (UAS) solutions that enable our customers to generate actionable data insights and create a safer, more efficient and sustainable world. We also have offices in Singapore and Helsingborg, Sweden, where the company has resided over the past decade. Xer delivers the most heavy-duty hybrid-electric multirotor UAS on the market. The Xer XB UAS is ready to fly in minutes, stay airborne for up to 2.5 hours, carry heavy payloads of up to 7kg and handle adverse weather conditions.

To strengthen our Team located in the greater Zürich area, we are looking for an experienced specialist for the position of:

### HEAD OF CERTIFICATION

**YOUR RESPONSIBILITY:** As Head of Certification, you will be responsible for regulatory and quality compliance of the Xer organisation with the worldwide UAS requirements. You will take the leading role in defining the applicable requirements for the product and the organisation. You will be responsible for implementing the appropriate measures to provide high quality and safety standards to our customers.

You will be involved in the quality assurance process within design, production and training organisations and will support your colleagues through the process. Your team will be expanded with additional compliance engineers, which means you will be coordinating, promoting and motivating these specialists as well.

**YOUR PERSONALITY:** You bring experience in the design and verification process for the UAS in the EASA-specific category and BVLOS authorisation. You worked with the Authorities on the relevant airworthiness and operational approvals and have a good understanding of the requirements, documentation, and related processes. You hold an engineering degree in electrical engineering, aerospace engineering or a comparable discipline.

You have experience in growing smaller/start-up organisations and are used to managing tasks at company and operational levels. Ideally, you have been involved in defining the company quality and safety process and possess the knowledge to implement those in organisations. You have a very good command of written and spoken English, and German as an additional language is a plus.

**YOUR PERSPECTIVE:** You will have the unique opportunity to decisively advance the industrialisation of a new generation heavy-duty UAS and contribute to the opening of the UAS market for many different applications. You will have the flexibility to implement your ideas and build significant knowledge in the unmanned industry. In the tradition of the owners, a worldwide research and risk analyses have been carried out, which guarantees long-term and sustainable company financing. The employment conditions are attractive and offer great potential for your future development. This role is an excellent milestone for your professional career with the goal of long-term engagement in the company.
