

A NEW HIGH-PERFORMANCE DRONE – MADE IN SWITZERLAND!

Xer Technologies AG (Switzerland) is dedicated to developing, producing and marketing heavy-duty and customisable unmanned aerial system (UAS) solutions enabling our customers to generate actionable data insights and create a safer, more efficient and sustainable world. The company has launched the first series, the X8 – a new generation of high-performance drones. Our products are built and further developed at our Swiss headquarters. To facilitate the rapidly growing organisation, we are looking for an experienced personality for the role as:

ACCOUNTANT & PURCHASING MANAGER (50% - 80%)

For support in accounting, purchasing and office management we are looking for an Accountant & Purchasing manager, 50-80%. Place of work: Dietikon, Zurich

Your responsibilities

Reporting directly to the CFO, you will have a dual role as accountant and purchasing manager. You take on accounting tasks, such as debtor/creditor management or quarterly financial statements. This also includes expenses, costs and reports. As you gain experience in this internationally oriented company, you will gradually take over supplier management. Working exclusively for management, you also take on planning and organizational tasks. You will soon become the central point of contact and largely determine new processes and standards, both for accounting and for the entire organization.

Your personality

You have accounting training and, in addition to accounting, you are well versed in purchasing or administration/organizational tasks. Ideally, you come from an engineering or production background and appreciate a dynamic, international environment. You are used to dealing with MS Office systems, ERPs or specialist applications. You are looking for an environment where you can contribute your broad experience and implement new ideas/improvements. You also value working independently and can react quickly to changes or new circumstances. You can communicate confidently in German and work in spoken and written English with partners around the world.

Your perspective

An innovative start-up awaits you, which already has over ten employees. You work with nationally and internationally selected top experts who are doing pioneering work for a new generation of drones. A professional collaboration with personalities (CEO & CFO) who have been working for owners/investors worldwide for over 10 years. With the current rapid development, you will experience strong change and have an influence in many areas. The employment conditions are attractive and offer a long-term commitment to the company. Become part of this success story!
