

A NEW HEAVY DUTY UAS GENERATION – MADE IN SWITZERLAND!

Xer Technologies AG is developing the next generation of long-endurance multirotor UAV systems for industrial, public safety and defence applications worldwide. Our Swiss-engineered platforms combine hybrid-electric propulsion with advanced autonomy to deliver unmatched endurance, reliability and operational flexibility.

As we continue to expand internationally, we are looking for a motivated individual to support our management team in driving our future growth.:

Internship – Strategy & Corporate Development

YOUR RESPONSIBILITY:

You will support the management team in shaping the future growth of Xer Technologies. Working directly with company leadership, you will contribute to strategic business development initiatives across international commercial and defence markets.

- Analyse customer requirements, industry trends and the competitive landscape
- Identify new business opportunities, target markets and strategic growth initiatives
- Prepare business cases, management presentations and strategic decision material
- Support the development of market entry strategies and go-to-market plans
- Support strategic partnerships, investment evaluations and interactions with investors, M&A advisors and corporate finance partners
- Research tenders, funding opportunities and strategic collaborations

This position provides unique insight into the strategic development of an innovative high-technology company and offers the opportunity to contribute directly to management decisions

YOUR PERSONALITY:

You are studying Business Administration, International Management, Economics, Finance, Business Analytics or a related discipline.

You have a strong interest in corporate strategy, market analysis and business development.

You enjoy analysing complex business challenges, identifying growth opportunities and developing practical solutions.

You work in a structured and independent manner, are comfortable analysing data and presenting your findings clearly to different audiences.

An interest in technology, aerospace, defence or innovation is an advantage.

A very good command of written and spoken English is required. German is considered an advantage.

WHAT WE OFFER

- Direct collaboration with the Management and Board on strategic initiatives
- Hands-on experience in corporate strategy and international business development
- Exposure to strategic partnerships, investment evaluations and M&A activities
- High level of responsibility with direct impact on management decisions
- Paid internship (80–100%) with flexible start date
- Minimum 6-month internship with a hybrid on-site/remote working model
